

MARINE EQUIPMENT GROUP

ONE GROUP – NINE BRANDS

CONNECTION WITH THE SEA

# SUPERIOR PRODUCT DESIGN & DEVELOPMENT

From concept to final product

## THE GROUP

---

To be a preferred supplier of specialist marine equipment for the global marine industry.

## VALUE PROPOSITION

---

Engineering Excellence  
Cutting Edge Production  
Integrated Solutions  
Global Reach Local Support

## AREAS OF BUSINESS

---

Rigging  
Propulsion  
Steering  
Hatches & Portlights  
Blocks  
Controls

# OUR COMPANY VALUES

## Our guiding principles

### SUPERIOR

product design & development – from concept to final product.

### EXCELLENT

customer service, from day one and throughout the lifecycle of the relationship.

### HUMILITY

through our communications and conversations.

### TRUST

in the process, our people and our products.

### ON-SCHEDULE

delivery of our products.

### WORLDWIDE

one group – worldwide support.

# OUR BRANDS

## Connected by the sea

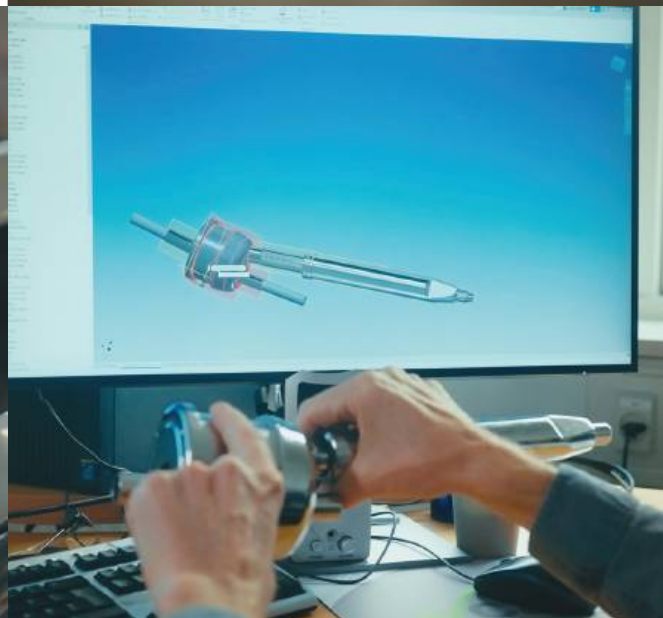

# BSI RIGGING & OYS

We are industry leaders in the manufacture and supply of standing rigging solutions in rod, wire and fibre including all associated hardware, components and terminations.

The complete process is managed in-house from design to engineering and manufacture. With a dedicated design and project management team from the initial contact through to delivery and aftercare, BSI and OYS rigged yachts are supported by a worldwide certified network of service agents and riggers.

Our customers are production yachts, superyachts, architects and mast makers. We supply to sailing boats from 7m to 150m.

# EASY

User-friendly high quality deck hardware for sailing yachts, the range includes blocks, clutches, stoppers, kickers, mainsheet system and rope jammers.

The products are manufactured in Denmark and the design is focused on ease of installation. We take pride in the construction process, the products are durable and offer sailors dependable performance in demanding conditions. The clutches are designed for secure line holding under high loads, low creep, and reliable engagement, even with modern high-performance lines.

Our customers are production sailing yachts, and private customers. We supply to cruising and racing sailing yachts from 7m to 15m.

**moonlight®**

# MOONLIGHT

Portlights and hatches allow light into the living spaces on board whilst enhancing the external styling of the yacht.

The hatches utilise our unique mechanical fastening method. They are available as a flush, low profile or offshore design. The portlights integrate seamlessly into the styling of your yacht bringing the outdoors inside.

Available in different styles, shapes and sizes, the range is adaptable, and spare parts are available to keep the hatch functioning for a prolonged period.

Our customers are production sailing yachts, private customers, commercial vessels and wind turbines. We supply to cruising and racing sailing yachts from 7m to 24m.

# JEFA STEERING

Jefa Steering design and manufacture light effortless steering solutions.

Our range includes autopilot drives, single and twin rudder systems, pedestals, and steering wheels, in both rack & pinion and wire variations. With full support from the factory around the world, Jefa Steering offer a superior, robust high-quality product at an optimal price with prompt delivery and clear installation instructions. This makes us the benchmark in the sector and the preferred choice for the some of the largest production yacht builders.

We meet the needs of outboard engine users with Electric Steer. We manufacture a light, efficient steering system that removes all hydraulics from the steering. No pumps. No hoses. No leaks.

Our customers are production yachts, private customers, and multihulls up to large sailing yachts. We supply to motorboats with outboard engines and sailing yachts from 7m to 24m.

# GORI PROPELLER

GORI Propeller design and manufacture a range of folding propellers for sailing boats.

Our propellers offer low water drag with effective manoeuvrability; they are available with patented single drive and overdrive technologies. At our facility in Denmark, we utilise the latest CNC machines and advancing technology to make certain our products are developed with even greater precision.

Our customers are production yachts, private customers, multihulls and one-design classes. We supply to sailing yachts from 7m to 24m.

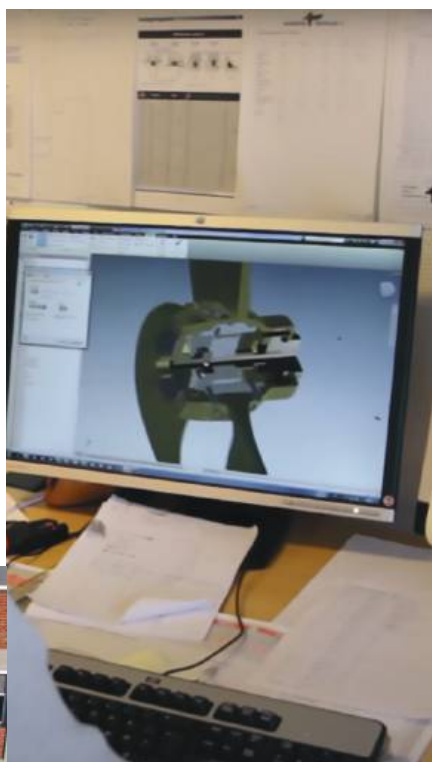

# HUNDESTED PROPELLER

Our complete system offers power regeneration and a hybrid power solution reducing the footprint the boat has on the environment.

Here in the seaside Danish town of Hundested, we custom design and manufacture controllable pitch propellers, pitch control units and marine gear boxes that enable yacht owners to utilise their propellers to maximum efficiency when under sail, motor and manoeuvring within a harbour.

We take pride that our equipment is built to last and is supported around the world direct from the factory by those who originally manufactured it.

Our customers are new or refit superyachts, commercial vessels, fishing vessels and military contracts. The vessels range in size from 10m to 150m.

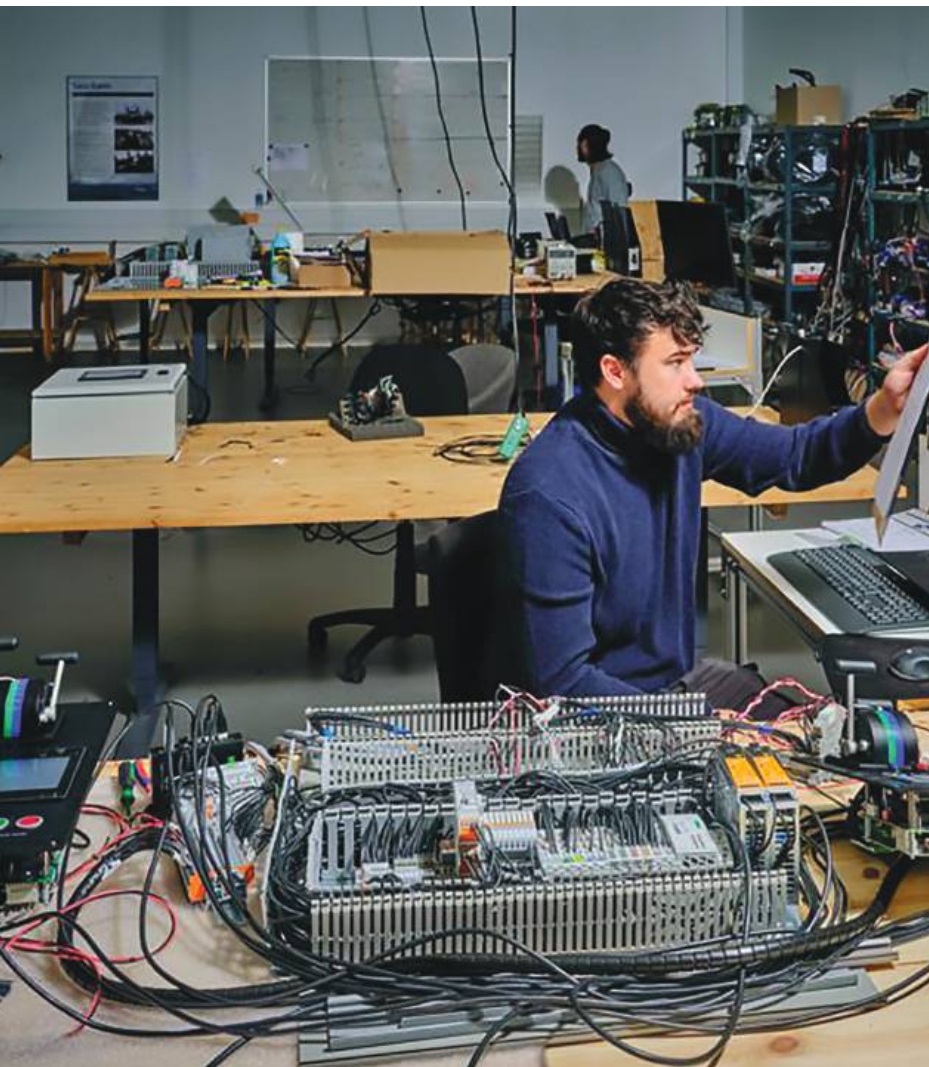

# LYNGAA MARINE

Since 1998, Lyngaa Marine has been delivering fast, highly reliable bridge control systems that give captains complete confidence when heading out to sea.

Over the years, our portfolio has expanded to include advanced propulsion control systems for controllable pitch propellers and thrusters, in addition to our custom engineered alarm and control systems.

Our customers are new or refit superyachts, commercial vessels, fishing vessels and military contracts. The vessels range in size from 10m to 150m.

# OCEAN MARINE SYSTEMS

We are a UK-based engineering firm that designs and manufactures bow and stern thrusters, hydraulic cylinders and underwater instrument deployment systems.

Every product is custom made to order to the customer's vessel requirements. We use the latest materials to meet the sympathetic needs of the vessel, and our talented team offer design, installation, commissioning, and maintenance direct from the factory. This provides flexibility for our customer and results in a solution that can operate in some of the harshest marine environments.

Our customers are new or refit superyachts, commercial vessels, fishing vessels and military contracts. The vessels range in size from 10m to 150m.

## MARINE EQUIPMENT GROUP

# ONE GROUP – NINE BRANDS

The BSI Marine Equipment Group owns facilities in Denmark, France, UK and USA. We operate a comprehensive network of certified service centres, dealers and partners. Our mission is to ensure global availability of products, a responsive service, and localised support.
